PROFESSIONAL SUMMARY

Cybersecurity student at Tolles Career & Technical Center with hands-on AWS cloud security, identity and access management (IAM), and web application security lab experience. Solid foundation in networking, Windows operating systems, and defensive security. Motivated, quick learner committed to building cyber defense skills and helping protect critical systems.

EDUCATION

Columbus State Community College **May 2029**

Columbus, OH

- **Coursework:** Database Fundamentals
- Enrolled via College Credit Plus (dual enrollment)

Tolles Career & Technical Center **May 2027**

Cybersecurity Program, Cloud and AI Automation focus *Plain City, OH*

- **Coursework:** Network Fundamentals, Cybersecurity Principles, Computer Hardware, Operating Systems, Troubleshooting, Security Best Practices

Hilliard Bradley High School **May 2027**

Hilliard, OH

PROJECTS

Automated AWS Security Baseline *CloudFormation | CloudTrail | AWS Config | EventBridge | Lambda*

- Built an AWS security baseline as code in a practice scenario modeled on Nationwide: multi-Region CloudTrail with log file validation, AWS Config rules for public S3 and open SSH, and SNS alerts via CloudFormation.
- Automated S3 Block Public Access restoration with EventBridge and a least-privilege Python Lambda, added a CloudTrail tamper alert and an SCP, and gated every change with cfn-lint and checkov in GitHub Actions.

AWS IAM Compliance Triage Engine *AWS IAM | SQL | DuckDB*

- Built a SQL-based engine that scans AWS IAM credential reports for root access keys, users without MFA, and access keys older than 90 days, then ranks findings by severity.
- Retested after remediation with before-and-after evidence, showing open findings drop from 4 to 0.

Least-Privilege AWS Access Simulation *AWS IAM | Least Privilege*

- Designed access around only the permissions required for a task, applying the principle of least privilege in AWS IAM.
- Reviewed the resulting permissions and security boundaries to confirm access was appropriately limited.

OWASP Juice Shop Security Lab *Web Application Security*

- Identified common web application security issues in a controlled, intentionally vulnerable lab environment.
- Applied defensive security thinking to understand how each vulnerability works and how to reduce the risk.

TECHNICAL SKILLS

Cloud & Security: AWS (IAM, CloudTrail), Cloud Security, Least Privilege, Security Compliance, Governance, Vulnerability Identification, Defensive Security
Networking & Systems: Network Fundamentals, Windows Operating Systems, Computer Hardware, Troubleshooting
Tools: SQL, DuckDB, Microsoft Office (Word, Excel, PowerPoint)
Professional: Communication, Teamwork, Analytical Problem Solving

CERTIFICATIONS (IN PROGRESS)

- CompTIA Cloud+
- Microsoft Azure Fundamentals (AZ-900)
- PCEP – Certified Entry-Level Python Programmer

LEADERSHIP & ACTIVITIES

SkillsUSA **September 2024 - Present**

Member

- Participate in career and technical education activities that build leadership, teamwork, and communication skills.
- Collaborate with peers on technical projects and career development opportunities.

My Very Own Blanket

- Assisted a nonprofit organization supporting children in need, demonstrating reliability and teamwork.
